ENGINEERING MOMENTUM

CNC Programmer – Full time

Epm are looking for an CNC Programmer to assist in our very busy machining workshop.

The Role

- Creating and proving of CNC programs, fixture and tooling layouts.
- Modification of existing CNC programs to accommodate design changes and process improvements.
- Creating programs for metallic parts, model and styling boards and composites for manufacture on both 3 axis and 5 axis CNC machines.
- Create set-up documents to supplement written programs.
- Analyse part designs to plan logical machining strategy.
- Performing all programming assignments using own initiative.
- Assisting the engineering team with machining method advice and quote time estimate.
- Ability to work to tight schedules where efficiency and quality are key.

About you

- A practical thinker, good at identifying problems and finding solutions.
- A thorough person with very good attention to detail.
- A good communicator.
- A team player who motivates people and encourages efficient team working.
- Presents a professional company image.

Qualifications, knowledge and skills

- Manufacturing/production engineering experience, gained within a low to medium volume high precision quality CNC machining environment.
- Experience of working with CAD & CAM packages ideally Catia V5 Manufacturing.
- Support “Best Practices” to achieve company goals for safety, delivery, cost and quality.
- Experience in 3 & 5 axis CNC Programming using Catia V5 Manufacturing.

BE PART OF OUR TEAM

- Hands-on experience in the setting up and running of CNC machines is necessary as the programmers need to have shop floor experience.
